UNDERSTAND THE AFRICAN MARKET
Across the African continent, there is a lack of centralised and actionable data on the most important commercial real estate market indicators for effective decision making. Where it is available, it is often in silos, unstructured, costly and varies markedly based on the source. In response to this Estate Intel was created.

We are an independent provider of commercial property research and data in Sub-Saharan Africa. With our Web Application, we have built a means for market participants to gain instant access to structured real estate data. Two of our key service lines are:

- Custom Research Reports based on client requests;
- Access to Free and Premium Subscriber Data on our Web Application.

We believe the ability to make data-driven decisions is crucial in the increasingly competitive African real estate marketplace.
MEET THE ESTATE INTEL WEB APP

FIND TENANTS & MARKET PLAYERS
Use our databases to find existing tenants suitable for your project or your service, track those who are coming into Africa.

GET MARKET DATA
Get an analysed perspective on yields, capital values, market drivers, lease trends, investment transactions and much more.

READ REPORTS
Access over 250 research reports with data on the African property sector and financial statements from African listed real estate and construction companies.

MAPS
Visualise our property database and compare key economic and demographic indicators.

VIEW PROPERTIES
View large collections of data and information on existing and pipeline buildings, their project team, occupancy rates, detailed specification data and more.

ADVERTISE
Give your real estate project, event, report or service visibility on all our digital channels (email, web application, website and social media).
ESTATE INTEL

LIST OF ALL FEATURES ON WEB APP
Access large collection of information on buildings, tenants and companies active in the real estate and construction sector, which have been organized for easy search and retrieval. Segments of this section include the:

- **Occupier Radar**: List of tenants in all office properties including data on their sector, expected lease expiry, estimated space occupied and more. This also includes a list of new companies looking to enter the country.

- **Retailer Insight**: Insight into the African retailer space through a visual representation of all the retailers in various countries including their locations (in and out of malls), franchise owners and estimated size occupied.

- **Directory**: Access a list of developers, architects, consultants, brokers alongside the projects they have worked on and their contact details.
Access over 250 research reports with data on the African property sector, which were published in the past 10 years. Reports included were authored by Estate Intel, multiple service providers and advisors, consultants and other market stakeholders. They also include our sale reports that provide transaction details on investment grade property acquisitions as well as Insight reports, which shed light on topical matters facing the industry. Segments of this section include:

- **ei Sale Reports**: View and download our Sale reports which offers a 2 page summary to investment disposals as well as our free and premium in-depth research reports that cover key themes noted in the African property market.

- **Insight Reports**: Brief periodic reports that discuss topical issues facing property markets across the continent.

- **Financial Reports**: Access over 300 financial statements of listed REITs, construction and real estate companies in Sub Saharan Africa.

- **Research Reports**: Learn about African property sector with access to over 200 reports with content on real estate markets.

- **Real Estate Laws**: PDF copies of relevant laws in selected African countries within the land, mortgage, private equity infrastructure and more from all relevant regulators.
We have examined and interpreted the large data sets in our repository to identify trends and meaningful patterns in lease and investment transactions, African REITs and listed property companies to quicken your decision making process. Get a view of yields, capital values, rental rates and much more. Segments of this section include the:

- **ei Index Series**: Track listed and unlisted real estate markets across sub-Saharan Africa using indices created from historic share price data for listed African real estate and construction companies and transactional pricing data from over 40 investment transactions over the past 6 years.

- **Lease Transaction Dashboard**: Our leasing dashboard will show amount of leased space, sectors driving growth, development pipelines, take-up and absorption rates.

- **Africa Fund Data Base**: The Africa Real Estate Fund database is a comprehensive list of real estate and related private equity funds including information on their asset, transactions, fund closes and fund managers.

- **Listed Real Estate Company Analysis**: Determine the financial strength of various African listed real estate companies or REITs by using key financial ratios and report summaries.

- **Investment Transactions**: Access transactional data on the disposal of sub-Saharan Africa investment grade assets and track the latest trends.

- **Loan Book History**: Access historical data on the total exposure that Nigerian banks have to real estate and construction as well as their non-performing loan ratios.

- **Rental and Land Price Factsheets**: Datasets that provide insight into rents and land prices across various property sectors.
Visualise our property database and compare key economic and demographic indicators for multiple regions across Africa using our interactive mapping tools. Segments of this section include the:

- **ei Master Map**: In-depth maps depicting all existing and new developments in the country with interactive data tools to display additional information.

- **Africa Data Dashboard**: Visualise, compare and download country level real estate, economic and demographic data points using heat maps.

- **Country Data Dashboard**: Visualise, compare and download state level real estate, economic and demographic data points using heat maps.

- **City Data Dashboard**: Pick a city and a property sector and get an interactive report. Information on leasing trends, rents, sale prices, construction data, supply, demand and maps are provided for each city selected.
VIEW PROPERTIES

View large collections of data and information on existing and pipeline buildings, their project team, tenants, occupancy rates, detailed specification data and much more. Features include:

- **List of Ongoing Projects**: Comprehensive list of ongoing development projects across the country with information on location, expected completion, project stage, use, developer and other members of the project team.

- **Property Market Stock**: Use and analyse our database of commercial property on the continent covering office, retail, residential and hospitality sectors.

- **Benchmark Study**: This enables users compare pricing and specification of multiple properties in tabular format.

<thead>
<tr>
<th>Service</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Research and Advisory</td>
<td>We provided advisory services to a local institutional investor looking to develop over 100 deluxe apartments in Victoria Island in partnership with a global private equity firm. This included a market study on historic and achievable sale prices and rents, analysis of buyer preferences and a benchmark study with competing projects to determine market positioning. We advised and recommended a suitable roll out plan, specifications and pricing values to be used for financial projections.</td>
</tr>
<tr>
<td>Advisory</td>
<td>We provided advisory to a family office developing a commercial building in Lagos who required an understanding of the supply/demand dynamics in the region, validated rental rates and contract terms to support the fund raising process.</td>
</tr>
<tr>
<td>Feasibility Studies and Advisory</td>
<td>We completed multiple feasibility studies to support the expansion of a service office provider who needed to understand the financial viability of multiple locations across Nigeria and parts of Western Africa. This also included advisory on the most suitable locations to expand to based on existing and project demand-supply dynamics.</td>
</tr>
<tr>
<td>Data and Research</td>
<td>We provided ongoing support for global professional service firms and real estate funds who required consistent access to market values, capitalisation rates, market stock and more.</td>
</tr>
<tr>
<td>Advisory</td>
<td>We supported development managers executing a development for a local oil and gas company in validating specification and pricing values.</td>
</tr>
<tr>
<td>Research</td>
<td>We provided research for a market regulator seeking to develop the Real Estate Investment Trust segment.</td>
</tr>
